Startup Engineer

Assured Integration, Inc is currently looking to fill the position of an Automation Startup Engineer. The role requires the ability to navigate/troubleshoot HMI graphics (Wonderware) and PLC software (Allen Bradley). Knowledge of electrical troubleshooting, motor control systems, and networking is also preferred.

Successful candidate will be responsible for the startup commissioning of industrial automation projects. This includes the responsibility of managing electrical checkout and verifying PLC/HMI controls. Candidates must be self-sufficient, as well as willing to work within a team. Travel to jobsites for commissioning will be required with an average of 75% annual away time, based on project workload.

Candidate must be able to climb ladders and industrial stairways and be able to lift to 50 pounds while in an outdoor environment.

Position allows candidate to work from their home office, assisting in project development, when not on active startups.

Benefits include Health Insurance, 401k, Paid Overtime, Company Holidays, and Paid Vacation.
