**Controls Engineer 1 and 2**

Assured Integration, Inc is currently looking to fill the positions of Controls Project Engineer 1 and 2.

The roles require mid to high-level experience in project organization/management, HMI graphics development (Wonderware) and PLC software programming (Allen Bradley). Experience in electrical troubleshooting, motor control systems, database development, networking, and control panel design would also be very beneficial.

Successful candidate will be responsible for individual aspects of industrial automation projects ranging in scope from conception to completion, depending on experience. This will include areas such as the design, programming, startup, and support of systems using PLCs, HMIs, motor controls, and data collection/reporting. Candidates must be self-sufficient, as well as willing to work within a team. Travel to jobsites for commissioning will be required based on project workload.

Position allows candidate to work from their home office when not on active startups.

Benefits include Health Insurance, 401k, Paid Overtime, Company Holidays, and Paid Vacation.
